

# 2019

## Capability **Statement**

# Keeping People **Connected.**

## About Us

Data Lync is a **technology integration firm** specialising in services for the aged, community and health care sectors. We procure, install, configure and maintain a range of care-based technology that specifically meets the unique needs of the residents, patients and staff who will ultimately be using your facilities.

Whether it's for a **new development** or an **upgrade to existing premises**, each solution is tailored specifically to your requirements. Wherever possible, we'll save you time and money by integrating with existing systems and only recommending the technology you really need.

① NEW DEVELOPMENTS

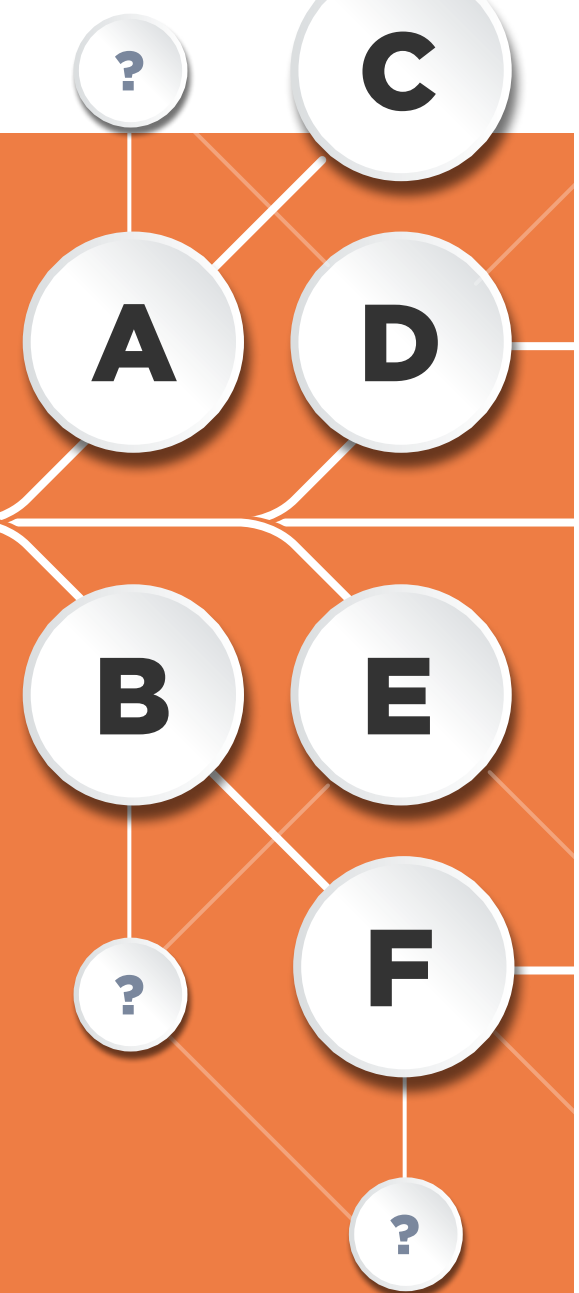

② EXISTING UPGRADES

# Connectivity with a **Choice.**

Data Lync is not aligned with a particular vendor or manufacturer. That means we don't get kick-backs from any of the solutions we recommend. Our systems are secure and designed with patient confidentiality in mind.

So, you can be confident you're receiving honest advice and recommendations for a secure solution you can trust to safely deliver value for you.

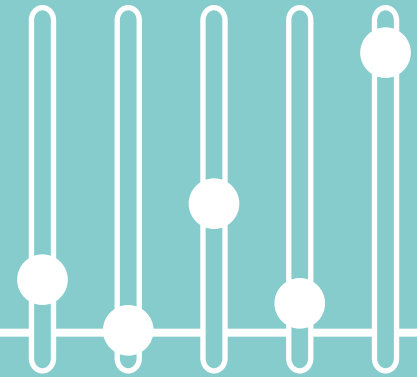

# SOLVING COMPLEX TECHNICAL PROBLEMS

**It's what we do.**

Wireless Networks  
Building Security  
Care Technology Systems  
Cabling and AV

# Complete Technological **Integration.**

Data Lync's range of services provide integrated, streamlined systems that make the day-to-day run smoother.

# Wireless **Networks.**

A large, light-orange circle on the right side of the slide contains a white Wi-Fi symbol. A horizontal white line extends from the end of the word 'Networks.' to the center of the Wi-Fi symbol. There are also several faint, dotted white arcs of varying radii centered on the Wi-Fi symbol, creating a ripple effect.

Our wireless networks support multiple services including: voice applications, resident or patient management systems, alarming and paging, secure corporate network access and flexible resident and guest internet access.

- > Central management for standalone ILUs or multiple sites
- > Optimised, secure and manageable guest networks
- > Corporate wireless networks in keeping with internal IT security requirements

# Building **Security.**

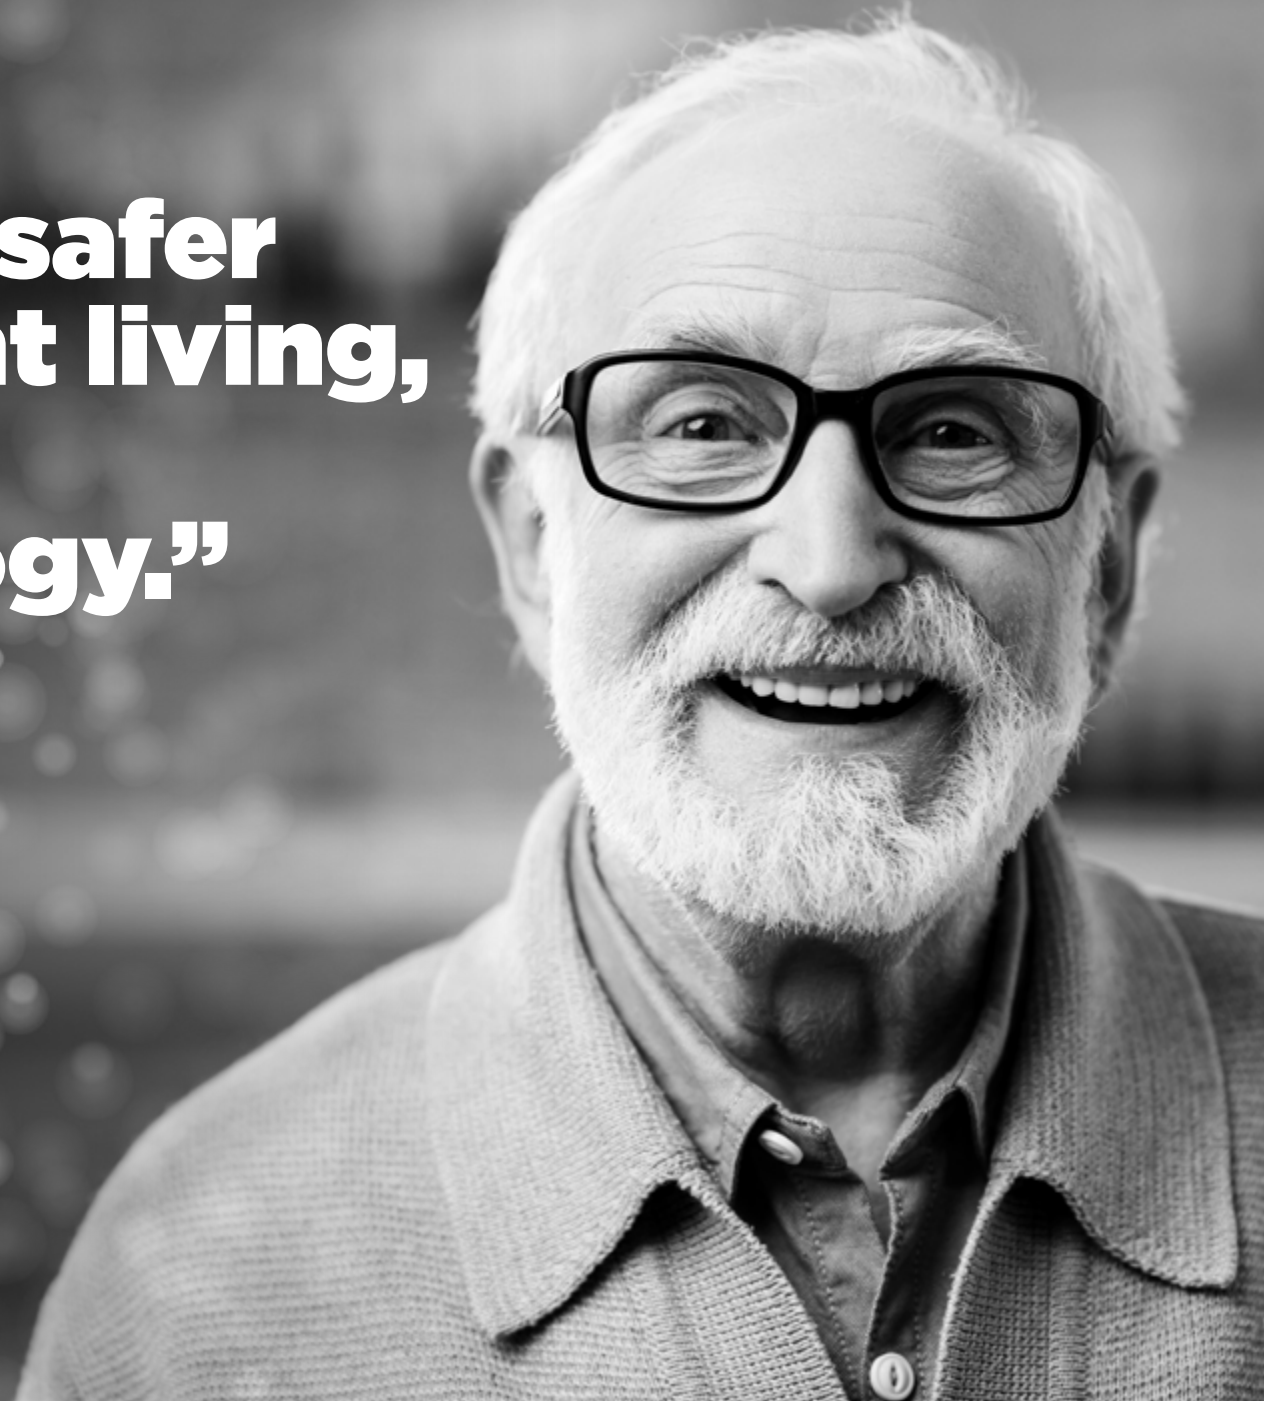

Residents, patients and staff rely on you to provide a safe and private facility. Our security system options include monitoring for: securing wings, medication storage, staff-only areas, theft and fall detection and video surveillance.

- > **Video surveillance including thermal cameras capable of fall detection**
- > **Electronic access control and intrusion systems**
- > **Video analytics**
- > **Video and voice-only Intercoms**
- > **Unified management platforms**
- > **Network audio systems**

**“Experience safer  
independent living,  
supported  
by technology.”**

**Data Lync understand  
the needs of our clients  
and the communities  
they provide for.**

# Care Technology **Systems.**

Patient and resident care technology can be a literal life-saver. Our reliable, responsive systems can assist in reducing risk while also providing your staff with access to thorough records and valuable insights into patient care.

- > Nurse-call and duress solutions
- > Trackers, including wearables
- > Middleware integration and alarming solutions
- > Extended functionality of existing legacy systems with reporting

# Cabling and AV.

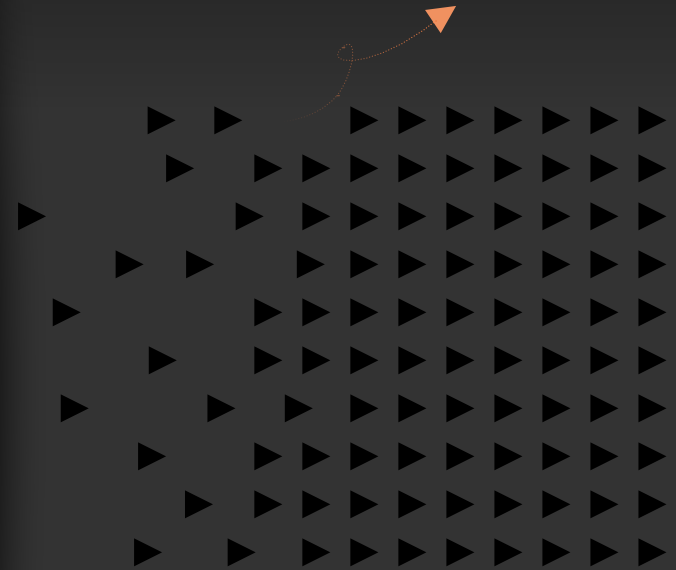

Great technology is only as good as the cabling that supports it. We can work with you to ensure your development has the best possible cabling and AV systems installed right from the start to support your future needs.

- > **MATV systems**
- > **Pay TV (Foxtel)**
- > **Ethernet and fibre cabling**

# DEFINING THE DATA LYNC DIFFERENCE

## We offer:

- Solutions that are specifically focused on the needs of organisations that provide care
- Extensive knowledge and experience in IT
- Custom-designed solutions for every project
- Servicing for greenfield and established sites
- An understanding of the legal and privacy requirements of the sector
